github.com/kvvraju24

## SUMMARY

Computer science student seeking Data Analyst, Data Scientist and ML internship or entry-level roles. Built an end-to-end sales-forecasting system on 1M+ records that beats a strong baseline, with leakage-safe validation, SHAP explanations and a deployed dashboard. Comfortable cleaning messy data and explaining results clearly.

## SKILLS

| | |
|---|---|
| **Languages:** | Python, SQL, C++, Java |
| **Data Analysis:** | pandas, NumPy, data cleaning & validation, exploratory analysis, Excel |
| **Machine Learning:** | scikit-learn, XGBoost, regression, classification, feature engineering, time-series validation, SHAP |
| **Visualization:** | Matplotlib, Seaborn, Power BI, Tableau, Recharts |
| **Databases:** | MySQL, PostgreSQL, SQLite |
| **Engineering:** | FastAPI, Django, React, Git & GitHub, GitHub Actions, pytest, Docker, Jupyter, Google Colab |

## PROJECTS

**Salevora — Retail Sales Forecasting** · github.com/kvvraju24/salevora — 2026

Python, pandas, NumPy, scikit-learn, XGBoost, SHAP, FastAPI, React · Live: salevora-forecasting.vercel.app

- Built an end-to-end forecasting pipeline on 1,017,209 daily sales records from 1,115 Rossmann stores, producing six-week daily forecasts for 856 stores.
- Engineered 21 leakage-safe features (calendar, promotions, holidays, competition, store format) and compared XGBoost, Ridge and a store × weekday × promotion baseline on a 42-day chronological holdout of 46,830 store-days.
- XGBoost reached **9.09% WAPE** and 13.27% RMSPE, with **7.4% lower MAE** and **10.8% lower RMSE** than the baseline; documented bias, missing-value handling and limitations in a model card.
- Explained forecasts with Tree SHAP (global importance and per-store drivers) and shipped a six-page dashboard (KPIs, forecasts, model comparison, data quality) with pytest and Playwright tests in GitHub Actions.

**Student Performance Analyzer** · github.com/kvvraju24/student-performance-analyzer — 2025 – 2026

Python, Matplotlib, Django, SQLite, JavaScript

- Python pipeline that validates, cleans and aggregates exam data (1,000 real and 5,000 synthetic students) into grades, rankings and averages.
- Caught missing columns, duplicate IDs and out-of-range scores with line-level error messages; exported CSV reports and Matplotlib charts; covered by 34 automated tests.
- Modelled the data in a normalised SQLite schema (students, subjects, 40,000 scores) behind a Django app with a filterable analytics dashboard.

**FitAI — Nutrition & Fitness Analytics App** — 2026

Python, FastAPI, SQLAlchemy, PostgreSQL, React, TypeScript

- Built 7/30/90-day progress analytics and weekly insights from user logs, leaving missing days blank, not zero.
- Curated 210 foods from ICMR–NIN Indian Food Composition Tables 2017; implemented BMR/TDEE calorie targets.
- PostgreSQL schema with Alembic migrations and 191 backend tests run on both SQLite and PostgreSQL.

## EDUCATION

**Lovely Professional University** · Phagwara, Punjab — Aug 2024 – Present

Bachelor of Technology in Computer Science (Core) · CGPA 6.0

**Sri Chaitanya Junior College** · Vijayawada, Andhra Pradesh — 2022 – 2024

Intermediate — MPC · 82.4%

**Narayana CBSE High School** · Nellore, Andhra Pradesh — 2021 – 2022

Secondary Education · 84.8%

## CERTIFICATIONS

| | | | |
|---|---|---|---|
| DSA in Python — Infosys Springboard | Sep 2025 | Problem Solving (Basic) — HackerRank | Nov 2024 |
| Programming in C++ — Infosys Springboard | Aug 2025 | Developer Job Simulation — Accenture | Oct 2024 |
| Computer Programming — LPU · iamNeo | May 2025 | Cyber Security Awareness — CareClub | Jul 2025 |
| C Programming — CSE Pathshala | Jan 2025 | | |

## ACHIEVEMENTS & ACTIVITIES

Industry certifications in AI and DSA from Oracle and Infosys Springboard — Sep 2025 – Jun 2026

Organised the “Carnival of Joy” event at Lovely Professional University — Aug 2025
